Forecast for Sunday 18 Sep 2022

Weather: Any patches of early morning mist and fog will soon clear, leaving a widely dry and bright albeit chilly Sunday morning. Showers are expected to feed in from the Irish Sea and may clip eastern parts of the Park at times, isolated showers may develop elsewhere during the afternoon, easing by the evening. Cloud thickening overnight introducing a risk of patchy rain and drizzle into Monday. Further patches of mist and fog forming in the early hours where skies remain clearer.

Chance of cloud-free hill tops above 800m: 80%, decreasing to 60% by midnight.

Low Cloud and visibility: Poor visibility in any early valley mist and fog, which may briefly cover some slopes and summits as it lifts and clears through the morning. Cloud will generally be above the summits throughout the day, but may cover tops above 700m at times, particularly in any showers. Cloud will also gradually lower into the evening, covering tops above around 600m by midnight. Brief deteriorations in visibility possible in showers, otherwise very good visibility expected.

300	9/9	11/9	12/10	13/11	12/11	10/10	10/10
Valley	11/10	12/11	14/12	14/12	13/12	12/12	12/12
Freezing Level*	1600m	1800m	2000m	1900m	2000m	2100m	2200m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Despite the bright sunshine at times, it will feel particularly cold near the summits, with significant wind chill to near freezing during the morning - therefore warm and waterproof layers are recommended.
